You can make online payments with the following credit cards:

[Visa](#), [MasterCard®](#), [JCB](#), [AMEX](#), [Diners Club](#) and [Discover](#).

To ensure the safety of your online payment, we adapt the Identity authentication service.

**What is 3-D Secure?

This "Identity authentication service" prevents unauthorized use of the card by a third party by authenticating the member's identity when shopping online using the member's device information, password registered in advance with the card issuer, SMS one-time password, biometric authentication, and other technologies.

For details, please refer to the authentication service of each international brand or contact the issuing credit card company.

[Notes]

If you are unable to use the Identity authentication service (3D Secure), please contact your credit card issuer for details.

If you interrupt the process at the credit card company's authorization screen, the transaction will not be completed. (Please do not use the back button on your browser.) Also, by interrupting the process, you will not be able to return to the current application screen. Please log in again from the top page of the application and proceed with the payment procedure.
